

9th International Conference on Biology and Synchrotron Radiation

13-17 August 2007, Manchester, England

LEARN, NETWORK AND EXPLORE FROM THE LEADING INTERNATIONAL SPECIALISTS OF BIOLOGY AND SYNCHROTRON RADIATION TECHNOLOGY

It is an exciting time for Biological sciences and synchrotron radiation.

Several new synchrotron sources will be coming on line including SOLEIL in France and Diamond in the UK. In 2007, the Synchrotron Radiation Source (SRS Daresbury) should still be producing important biological results, Diamond will be commissioned and VUV Free-electron-laser based prototype facility of 4GLS should be completed at Daresbury. The world's first X-ray coherent source, LCLS is scheduled to produce its first beam in 2008 offering new opportunities to the biophysics and biological communities.

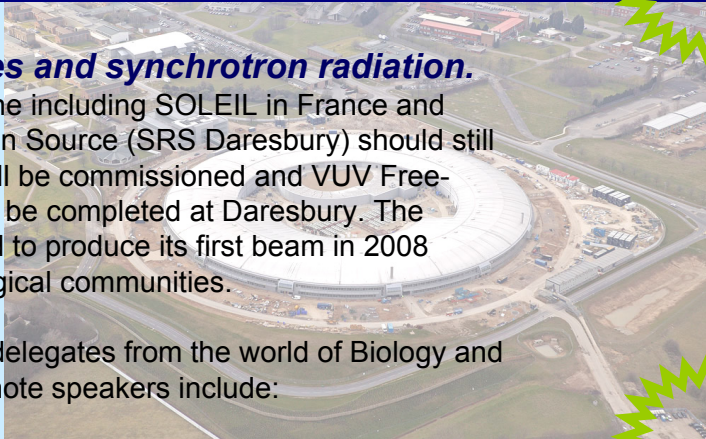

The 9th Conference will attract over 600 international delegates from the world of Biology and Synchrotron Radiation Technology. Already the key note speakers include:

Plenary Speakers:

- Janos Hajdu (Sweden)**
High Resolution Structure from a single molecule
- Keith Hodgson (USA)**
New Opportunities and Challenges : Journey from SPEAR to X-FEL
- Malcolm Irving (UK)**
Towards the understanding of Muscle mechanism.
- So Iwata (UK)**
Are membrane proteins still a special case?
- Venki Ramakrishnan (UK)**
Ribosome and Protein-Nucleic acid complexes
- David Stuart (UK)**
Challenge of Structural Virology
- Dmitri Svergun (Germany)**
Structures of Proteins and their complexes in solution
- Shigeyuki Yokoyama (Japan)**
Structural Biology Revolution: Changing Face of Structural Genomics
- Johann Deisenhofer (USA)**
Special concluding lecture: Biology & SR Current, Past & Future

Joint Chairs:

- Samar Hasnain (CCLRC Daresbury)**
and **Louise Johnson (DIAMOND and Oxford University)**

VENUE The G-Mex/MICC is located in the heart of Manchester, easy to find, whether arriving by air, rail or road.
